

AMENDMENTS TO THE SPECIFICATION

Please amend the title to read:

MANAGEMENT AND DISPLAY METHOD FOR NETWORK CONNECTION OF
ELECTRONIC APPARATUS

Please replace the paragraph beginning at page 7, line 10 with the following amended paragraph.

The AV apparatus 10 has ~~Linux~~ LINUX (registered trademark) installed thereon as an OS (operating system), and is connected to the communication network 23 over a connector plug 21 of Ethernet (~~registered trademark~~) and a LAN (Local Area Network) cable 22.

Please replace the paragraph beginning at page 7, line 14 with the following amended paragraph.

It is noted that the AV apparatus 10 forms a hardware item of the present invention, and includes a connector jack 11 for Ethernet (~~registered trademark~~), an access controller 12, and a micro-computer 13 for system control. In this case, a connector plug 21 is plugged into the connector jack 11, such that the AV apparatus 10 is connected over the LAN cable 22 to the network 23.
